

## ANISE FLAVOR 2X DRY

### DESCRIPTION

Anise Flavor is a sweet taste supplement which makes all animal feeds more desirable and palatable.

### APPLICATIONS

Anise is most enticing flavor for many livestock animals. Use it as an enhancer for feeds you have developed for dairy and beef cattle, pigs, hogs and sheep. It is especially recommended for use in mineral feed formulations.

### FEATURES AND BENEFITS

Anise Flavor 2X, in either powder for liquid form, imparts a persuasive anise taste and aroma that attracts livestock to a variety of feed rations. It is particularly effective when used in mineral formulations to mask inherent chalkiness and bitterness. For the same reason, it allows for a wide variance in feed ingredients. Agri-Flavor's Anise Flavor 2X is a researched product that offers improved stability, and it blends easily too.

### RECOMMENDED FEED BLEND

**Dry** - Use 1/2 to 2 pounds per ton of feed. **Liquid** - Use 4 to 16 ounces per ton of feed.

### INGREDIENTS

**Dry** - Contains anise, anethol, natural and artificial flavors, natural and artificial sweeteners, roughage products, attapulgate clay, and TBHQ (to preserve flavor). **Liquid** - Contains vegetable oil, anethol, other natural and artificial flavors and TBHQ (to preserve flavor).

### APPEARANCE

**Dry** - Fine textured, light brown, free-flowing granular material. **Liquid** - Clear, colorless fluid.

### COMPATIBILITY

It is safe and effective with all ingredients normally used in animal feeds.

### PURITY

It is manufactured and sold in strict compliance with the U.S. Food and Drug Administration's standards for purity and quality.

### PACKAGING

**Dry** – Standard packaging for dry-formulations is a 50-lb. Bulk bag. Products can also be packaged in a range of 1 to 2 ½ lbs. heat-sealed packets upon request. **Liquid** – This formulation is sold by the pound and is available in quantities from 50 to 450 lbs. All containers are clearly labeled as to product name, ingredients and recommended directions for use.
