

BUTTERSCOTCH CREAME 1-200

DESCRIPTION

Butterscotch Creame 1-200 is a taste and flavor enhancer with a sweet aroma that is especially appealing to baby animals.

APPLICATIONS

Butterscotch Creame 1-200 primarily increases the young animal's conversion to milk replacer, thus enabling the animal to be weaned sooner and begin eating dry feeds more readily. It can also be used in starter rations of many animals to convert them from milk replacer to solid feed.

FEATURES AND BENEFITS

Butterscotch Creame 1-200 is an inexpensive alternative to standard sweeteners. One pound replaces the sweet taste of approximately 200 pounds of sugar. It blends well into all feed mixtures and allows for a wide variation in feed ingredients, in addition to easy to use. Butterscotch Creame 1-200 contains a creamy aroma and taste. It is sweetened to appeal to the sweet tooth of baby and young animals. The flavor ingredients give an enticing aroma long after blending.

RECOMMENDED USE RATE

Use $\frac{1}{2}$ to 2 pounds per ton of feed to achieve the sweetening effect of 50 to 200 pounds of sugar.

INGREDIENTS

A blend of butterscotch concentrates, vanilla, butter esters, sweet whey, other natural and artificial flavors, natural and artificial sweeteners, flogard, and TBHQ (to preserve flavor).

APPEARANCE

A finely textured, tan, free-flowing, water soluble powder.

COMPATABILITY

It is safe and effective with all ingredients normally used in animal feeds.

PURITY

It is manufactured and sold in strict compliance with the U.S. Food and Drug Administration standards for purity and quality.

PACKAGING

Standard packaging is 50-pound bulk quantities, sealed against air and moisture intrusion. Cartons are clearly labeled by product name, ingredients and recommended directions for use.
